# Feedback received following the Safe & Sound workshop

"The course was excellent, and many have said the best and most relevant training to do the job they have ever done."

"The best training course I have attended in a long time. Many people can deliver material, however it takes a skilled trainer to create a safe space to allow people to share their thoughts on difficult topics and also I thank Dave for his personalised response to peoples' contributions to the discussions."

"I found it really useful to understand the psychology behind why people's behaviour changes and how to deal with this. Thank you for also addressing the mental health side of aggressive behaviour as I sometimes feel that it is expected that we will just have deal with it as a part of our jobs."

"I found the workshop a really helpful and positive experience and well worth committing a day to. Just the right length and all points very clearly delivered and explained. It helped to stand back and take an objective view of how interactions work and to think about how to do things differently or more effectively. I liked the pace and the breaking up of time into different activities. Thanks very much for an excellent session."

"Given the restrictions, due to coronavirus, that this couldn't be delivered face to face, this was an excellent workshop. Relevant to the experiences of the participants, pitched at the right level and an obvious wealth of expertise and passion for the subject. Dave is worth listening to and learning from."

"The course has made me think a lot more about my own safety before I enter a situation. The scenarios and examples of sentences were very helpful. It has increased my confidence and given me great practical advice and ideas to take out with me every day."

"The actors brought the situations to life which was helpful to envisage how changes could be made in handling situations."

"Very glad we had actors so didn't have to role play."
